

THANK YOU FOR BECOMING PART OF OUR STORY

When you unwrap this chocolate bar, you're opening more than chocolate.

Inside are ingredients that carry stories of people, landscapes, and resilience from across Indonesia.

This is one of our climate-smart products journey from our brand,

Dear everyone

SU-re.CO
Sustainability & Resilience

A Touch of Coffee from Wanagiri

Our signature ingredient is climate-smart roasted Arabica coffee from Wanagiri, Buleleng. Carefully roasted and blended into the chocolate.

This coffee comes from our farmers partner in the climate-vulnerable highlands of Northern Bali, where changing rainfall and rising temperatures increasingly challenge every harvest.

We work alongside farmers through Climate Field Schools, biogas, and climate-smart agriculture to build stronger livelihoods and landscapes that can adapt to a changing climate.

The Crunch Comes From Eastern Indonesia

Inside every bite, you will discover the gentle crunch of blanched kenari nuts from Maluku.

Native to Eastern Indonesia, Kenari has long been part of local food culture and forest landscapes. It grows among trees, offering a way for forests to continue providing value without being cleared.

The crunch is a small reminder of our gratitude to the local communities who keep these traditions, landscapes, and ingredients alive.

One more story brings it all together...

The Cocoa That Brings It Together

The chocolate itself is crafted in Bali in collaboration with Primo Chocolab, our chocolate manufacturing partner.

While su-re.co brings together the story of climate-smart ingredients, Primo Chocolab helps transform them into the chocolate bar you are holding today.

This collaboration is part of climate-smart production: working with local partners, creating value from Indonesian ingredients, and making sustainability easier to experience in everyday life.

PRIMO CHOCOLAB.

Our products are sustainable gifts specially made from Indonesian farmers to you.

By sharing these gifts, you also become a giftmaker, contributing to the provision of renewable energy and organic fertilizer for farmers, as well as supporting climate change education.

Through su-re.co's Think-Do-Be-Tank model, every product connects research, action, and everyday choices into one shared system.

Thank you for being a Giftmaker.
